San Patricio Electric Cooperative Annual Report

The following pages contain information about the operation of your electric cooperative over the past year.

We encourage you to review the information; if you have any questions, please don't hesitate to contact us at (361) 364-2220.

We also encourage you to attend the cooperative's annual member meeting.

San Patricio EC Annual Member Meeting

Thursday, September 10, 2026 | San Patricio County Civic Center
219 W. Fifth St., Sinton

Registration opens at 5:30 p.m., and the business meeting begins at 7 p.m. The determination of a quorum will be made upon the closing of registration.

*San Patricio Electric
Cooperative, Inc.*

Your Touchstone Energy Cooperative

President's Message

Folks who make a living off the land know you can't control everything. Some years bring plenty of rain. Other years, you're praying for it. Storms come when you least expect them, and sometimes the best thing you can do is prepare ahead of time and keep moving forward.

Those lessons I've carried with me in my farming career have served me well as your board president. Just like farming, leading an electric cooperative takes patience, careful planning and a commitment to doing what's best for the long haul.

The cooperative belongs to its members, and that's something we're proud of. Every member of your board of directors—including me—is a member of San Patricio Electric Cooperative, elected by our neighbors to provide oversight and help chart the cooperative's path for the future. Our responsibility is to make sure the co-op stays financially strong and true to the mission it was founded on more than 85 years ago.

The co-op doesn't answer to outside investors expecting a profit. Instead, your board of directors works to ensure the cooperative remains financially healthy while keeping all members' best interests at the heart of every decision.

Our members directly experience the rewards of the co-op's not-for-profit business model. At the end of last year, SPEC returned \$2.6 million to its members. Of that amount, \$800,000 was given back as billing credits and another \$1.8 million was returned through capital credits checks.

Each year, your board of directors evaluates the cooperative's financial standing and determines what, if any, margins can be returned to our members. And we have a good track record of returning funds. Since 2008, SPEC has retired more than \$24 million in capital credits. That's the cooperative difference.

We're also investing in the future. This year, the cooperative awarded \$100,000 in scholarships to 10 local students and sent two outstanding young people to Washington, D.C., through the Youth Tour program. These opportunities help prepare the next generation of leaders, and I hope many of them will one day bring their talents back home to our communities.

Beyond these programs, we work to support our communities by donating photos to participants at area livestock

shows, providing school safety demonstrations, offering free energy audits, and supporting local organizations through donations and volunteerism.

One thing that especially stands out to me is the dedication of our employees—to our members, to each other and to safety. This year, they celebrated 18 years without a lost-time incident—an incredible accomplishment in such a potentially hazardous industry.

By God's grace and through their commitment to one another, they've built a culture in which everyone looks out for each other, and that's something worth recognizing. Lord willing, SPEC employees will celebrate 19 years without a lost-time incident in November. I hope you'll join me in praying for their continued safety.

A good operation starts with good people, and I believe we're fortunate to have that at SPEC.

Our general manager, Freddy Wolff, has just completed his first year of service at SPEC. The board selected Freddy because we believed he had the experience, character and vision to lead SPEC into the future, and over the past year he's proven that confidence was well placed. I appreciate his leadership and look forward to working alongside him as we continue serving our members.

As we look ahead, we'll continue working to make thoughtful decisions that protect the long-term strength of this cooperative while supporting the reliable service our members depend on every day.

Thank you for your continued trust and support. It is an honor to serve as your board president, and I hope you'll join us at our member appreciation event and annual meeting September 10.

Tom Mayo

Tom Mayo, President

Board of Directors

San Patricio Electric Cooperative

Manager's Message

Change is inevitable. It's something we see every day. The technology we rely on is changing. The demands placed on the electric grid are changing. The needs of our members and communities continue to evolve.

As I reflect on my first year serving as your general manager, one thing has become especially clear: While many things around us continue to change, the values that have guided this cooperative for 88 years remain the same.

Over the past year, I've had the privilege of meeting members across our service territory and gaining a deeper appreciation for what makes San Patricio Electric Cooperative unique. Every cooperative has poles and power lines, but what truly sets SPEC apart is the people behind it—the employees who answer the call when members need us and the members who make this cooperative their own.

Our mission remains unchanged: to provide safe, reliable electric service while continuing to serve our members and communities with integrity.

Across Texas, electric cooperatives are preparing for unprecedented growth in electricity demand. Large industrial facilities, data centers and other major electric loads are reshaping how utilities plan for the future.

As your electric cooperative, we have an obligation to serve any member located within our service territory. Large electric loads bring new challenges to the grid, and it is our responsibility to evaluate those impacts, invest in infrastructure where needed and work closely with our power providers and industry partners to ensure our system is prepared for the future.

Planning for the future isn't just about meeting tomorrow's energy needs. It's also about being ready to respond when the unexpected happens. This year, our system and our employees were tested by some extraordinary challenges.

In May, back-to-back severe thunderstorms caused nearly as many outages as Hurricane Harvey did in 2017.

Our crews worked long days, trudged through mud and even used a paddleboard to access a flooded area to restore power. It was a tough week, but I'm proud of the professionalism, skill and determination our employees demonstrated every step of the way.

We faced another extraordinary challenge in July when lightning damaged a substation transformer in West Sinton. While outages caused by storms and equipment damage are not unusual, a failure of this magnitude is extremely rare.

Substation transformers are among the most critical and complex pieces of equipment in the electric system, and replacing one is not as simple as replacing a damaged line or pole.

To maintain reliable service while permanent repairs are made, SPEC worked closely with South Texas Electric Cooperative to bring in a mobile substation. This specialized equipment had to be transported, installed, tested and safely energized before it could begin serving our members. That complex process required more time than members typically experience during an outage, but it allowed service to be restored while

permanent repairs continue.

Of course, not all change comes in response to challenges. Some changes represent progress.

This year, SPEC proudly welcomed our first female lineworker—a milestone in our cooperative's history. While the faces serving our members may change over time, our expectations remain the same. Every employee is held to the highest standards of safety, professionalism and service.

That same spirit of service extends beyond the communities we power. In November 2025, two SPEC lineworkers traveled to Guatemala to help bring electricity to families who had never had it before. Their willingness to share their skills and serve others reflects the cooperative principle of Concern for Community and is a reminder that the cooperative spirit reaches far beyond the communities we serve here at home.

This year, you'll also notice a change in one of our longest-standing traditions—our annual meeting.

For decades, the annual meeting has been an opportunity for members to gather, hear the latest cooperative news, elect directors and reconnect with neighbors. Those things aren't changing. In fact, they're exactly what we're working to preserve.

This year, we've reimaged the event as a member appreciation event and annual meeting, moving to a Thursday evening and creating an experience that offers more opportunities for members and families to engage with their cooperative.

We want this event to remain meaningful for today's members while honoring the traditions that have made it special for generations.

Families are busier than ever, and member expectations continue to evolve. As your cooperative, we have a responsibility to evolve as well—finding new ways to connect with our membership while preserving the transparency, accountability and member participation that have always defined the cooperative business model.

We hope the changes we've made will encourage even more members to participate and experience what it means to be part of a cooperative.

As we look ahead, we will undoubtedly face more changes. New technologies will emerge. Electric demand will continue to grow. Our communities will evolve.

But there are some things you can always count on. You can count on our employees to answer the call when storms strike. You can count on your board of directors to provide thoughtful oversight. And you can count on SPEC to provide the safe, reliable electric service you depend on.

I hope to see you September 10 at our member appreciation event and annual meeting.

Freddy Wolff

Freddy Wolff, General Manager
San Patricio Electric Cooperative

December 31, 2025 and 2024

Independent Auditor's Report

To the Board of Directors
San Patricio Electric Cooperative, Inc.
Sinton, Texas 77954

Report on the Audit of the Financial Statements: We have audited the accompanying financial statements of San Patricio Electric Cooperative, Inc., which comprise the balance sheet as of December 31, 2025 and 2024, and the related statements of income and patronage, capital, cash flows for the years then ended, and the related notes to the financial statements. In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of San Patricio Electric Cooperative, Inc. as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Accounting principles generally accepted in the United States of America.

Basis for Opinion: We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of San Patricio Electric Cooperative, Inc. (the cooperative) and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements: Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the cooperative's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements: Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that the audit conducted in accordance with generally accepted auditing standards and Government Auditing Standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they could influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and Government Auditing Standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the cooperative's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the cooperative's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Report on Supplementary Information: Our audit was conducted for the purpose of forming opinions on the financial statements as a whole. The schedules of electric plant, accumulated provision for depreciation, patronage capital, administrative and general expenses and four year comparative data are presented for purposes of additional analysis and are not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Other Reporting Required by Governmental Auditing Standards: In accordance with Government Auditing Standards, we have also issued our report dated March 19, 2026, on our consideration of the cooperative's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters.

The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the cooperative's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the cooperative's internal control over financial reporting and compliance.

	2025	2024	CHANGE	% CHANGE
Revenue	\$33,172,351	\$31,523,711	\$1,648,640	5.23%
Margins	\$3,922,070	\$3,092,846	\$829,224	26.81%
Assets	\$101,001,402	\$96,541,446	\$4,459,956	4.62%
Kilowatt-Hour Sales	255,765,698	251,406,519	4,359,179	1.73%
Net Value of Plant	\$68,460,871	\$62,359,081	\$6,101,790	9.78%

Minutes of the Annual Membership Meeting of San Patricio Electric Cooperative

September 13, 2025

The Annual Member Meeting was held on September 13, 2025, at the Bee County Exposition Center, in Beeville, Texas. Those present were:

Members

169 attending the meeting in person
770 mail-in or electronic ballots were received

Directors

Tom Mayo, President
Jim Bassett, Vice President
Clyde Stewart, Secretary
Daren Wilder
Tryne Mengers
Gary Jones
Jack Bishop

Others

Milton Lorenz, Attorney
Freddy Wolff, General Manager
Brittany Williams, Public Relations Manager
Employees

Quorum

Mr. Mayo called the meeting to order at 9:32 a.m. Mr. Mayo declared a quorum was represented through member attendance and voting ballots. There were 8,030 members with a required quorum of 150. There were 252 total attendees in person, including 169 registered members, and 770 members were represented at the meeting by mail-in or electronic ballot, which constituted a quorum.

Invocation

The invocation was given by Director Daren Wilder.

Pledge of Allegiance

The pledge of allegiance was led by Caleb and Avan from Scout Troup 450.

Board Introduction and Special Guests

Mr. Mayo welcomed the members to the meeting, recognized the exhibits, and introduced the Board of Directors.

Mr. Mayo introduced special guest Cliff Lange with South Texas Electric Cooperative.

Official Notice

Mr. Mayo stated the official notice was mailed to all members and announced the reading of the notice would be waived.

Waive Reading of Minutes

Mr. Mayo announced the reading of the September 28, 2024, Annual Member meeting minutes would be waived as the minutes were printed in the September issue of *Texas Co-op Power* magazine.

Minutes Approved

Mr. Mayo requested a motion to approve the September 28, 2024, Annual Member Meeting minutes as mailed. A motion was made to approve the 2024 Annual Member Meeting minutes as printed. The motion passed.

President/Manager/Secretary Reports

Mr. Mayo reported the President, Secretary, and Manager reports were published in the *Texas Co-op Power* magazine.

Youth Tour Presentation

Mr. Mayo introduced SPEC's 2025 Youth Tour delegate, Julie Jones. Ms. Jones gave a presentation about her experience on the trip to Washington, D.C., and thanked the membership for supporting the Youth Tour program.

Introduction of General Manager

Mr. Mayo announced that SPEC's long-time General Manager, Ron Hughes, retired. The board of directors spent the better part of the year in a thorough process to find the co-op's next leader. He introduced SPEC's new General Manager, Freddy Wolff, who had been on the job for only four weeks.

General Manager Addresses Members

Mr. Wolff then addressed the members.

Mr. Wolff began with a personal update, sharing about his background and co-op experience. He expressed his excitement to serve as General Manager and a neighbor.

Next, Mr. Wolff shared San Patricio Electric Cooperative's story, explaining what it means to be a member of a co-op. He expressed that SPEC's service extends far beyond the co-op's power lines. He showcased examples of employees volunteering in the community and teaching electricity safety to schools. He shared about the co-op's investment in local youth through the scholarship and Youth Tour programs. He explained how the co-op has offered support to local volunteer fire departments and other community organizations.

Mr. Wolff provided an outlook on the cooperative's future. He reminded members that the co-op is halfway through a two-part rate adjustment due to the effects of inflation. This is the first rate increase the co-op has implemented since 2006. He also mentioned SPEC is expecting some large loads to start service within its system in the near future. This potential growth is promising as additional growth on the system helps to stabilize costs for all members.

Next, Mr. Wolff announced the co-op was finalizing a new four-year work plan. This plan serves as a roadmap for the co-op to maintain safe, reliable service while supporting future growth in our communities.

Lastly, Mr. Wolff addressed broadband. He explained that the co-op previously conducted a feasibility study and determined it was too costly to build out a system to all members. Today, there is more competition in the broadband market. The co-op has seen more providers move into its service area as well as advancements in satellite technology. However, Mr. Wolff explained that broadband is something the co-op will continue to evaluate as it looks toward the future.

Mr. Wolff then addressed question and comments by the members.

One member asked if the co-op monitors outages 24/7. Mr. Wolff responded that the co-op is always monitoring its system.

Another member asked if there were any plans for data centers in the co-op's service territory. Mr. Wolff explained every co-op is

being contacted about data centers. SPEC has only had informal discussions with data centers and does not currently have any being built in its service area; however, if anything materializes, the co-op has an obligation to serve any potential member seeking electric service in its service territory. There are a lot of pros and cons to serving data centers. Some co-ops have successfully integrated them into their service area, but they do come with a lot of risk.

As a follow up, another member asked if the answer for data centers also applies to crypto mining. Mr. Wolff explained that they are somewhat different. New data centers today are primarily used for artificial intelligence, and they require a lot of electricity for data processing.

Another member shared that SPEC linemen, Jerry Perez and Jesse Rivera, stopped to help put out a grass fire. She thanked them for going above and beyond in the community.

The next member asked if the co-op would offer an electronic recycling event again. Mr. Wolff answered that SPEC plans to host a recycling event again in the future.

One member mentioned that he was a volunteer firefighter for the Swinney Switch Volunteer Fire Department. He thanked the co-op for its support. Mr. Wolff also thanked him for his service to the community.

The next comment came from a member who commended SPEC Lineman Martin Villarreal for stopping to see if she needed help when she was pulled over on the side of the road. She said she was proud the co-op's employees will go above and beyond to help.

Another member commented that she could count on one hand the outages she's had through all her years as a SPEC member. She thanked the co-op for always being so prompt when outages do occur.

One member shared that SPEC Linemen Jerry Perez and Ysidro Peña likely saved her from a fire. They saw a grass fire approaching her home when they were driving by. They quickly stopped and knocked on her door, warning her to the danger. Then they called the fire department and worked to protect her home until they arrived.

Another member commented that he thought the board made a great decision in hiring Mr. Wolff.

The final member commented that she thought SPEC was incredible and had nothing but good things to say about the co-op.

Employees

Mr. Mayo introduced the employees to the membership. Mr. Mayo thanked the employees for their dedication to the cooperative. He explained that the employees hold an excellent safety record, having worked over a million hours without a lost-time accident. He announced that, lord willing, the employees would reach 18 years without a lost-time accident in November.

Nominating Committee and Credentials and Election Committee

Mr. Lorenz introduced the 2025 Nominating Committee and the 2025 Credentials & Election Committee. He thanked them for their work.

Election Results

Mr. Lorenz reviewed the nominating and voting procedures. He reported the Nominating Committee selected the following nominees for the election of directorship: Tryne Mengers for District 3 and Michael "LT" Tynan and Daren Wilder for District 4.

Mr. Lorenz presented a certification from the Credentials and Election Committee certifying the ballot count for the elected directors.

District 3 (three-year term)

► Tryne Mengers received 706 votes.

District 4 (three-year term)

► Daren Wilder received 474 votes.

► Michael Tynan received 284 votes.

Mr. Lorenz announced, based on the Credentials and Election Committee's ballot certification, the elected directors were Tryne Mengers, District 3, and Daren Wilder, District 4.

There were a total of 8,030 eligible voters.

Out of 770 ballots received, 537 were paper ballots and 233 were online ballots. That equates to 9.59% participation from eligible voters.

Adjourn

Mr. Mayo thanked the members for attending SPEC's Annual Meeting. The meeting was adjourned at 10:40 a.m.

Congratulations to SPEC Scholarship Recipients

EACH YEAR, San Patricio Electric Cooperative awards outstanding graduating high school seniors within our service area with scholarships. This year, SPEC awarded \$100,000 in scholarships to 10 students. Each student will receive a \$10,000 scholarship that will be divided evenly among their first four semesters of college, provided they meet the standards established for the scholarship program.

Each semester, the student must submit records showing that they have completed a full-time course load (12 hours or more), are enrolled as a full-time student for the upcoming semester and have maintained a GPA of 2.5 or greater.

This scholarship is just one of the many ways we express our commitment to our members. We're proud to have the opportunity to help these deserving students pursue their dreams. Congratulations to our 2026 scholarship recipients! We wish you the best of luck in all your endeavors. ■
